MEMORANDUM FOR: Mr. Gene Kiefer, DFD/SA/Technical Analysis

SUBJECT : Official Use of [] on CIA Personal Services Contract

25X1

1. It has come to my attention that [] now of the [] and formerly a Major in the U. S. Air Force, has some status with CIA under a personal services contract [] Form 415, dated 12 May 1960 to the HDGI.

25X1

25X1

2. As you know during the past five years we have had extensive contact with [] in connection with 117L Committee activities. Since his departure from the 117L Program and the U. S. Air Force, [] has had his clearances removed and apparently he would now try to offer his services and that of [] to CIA in whatever capacity they might be used to develop intelligence data systems handling and methods of exploitation for present and perspective photographic inputs to CIA. I have always been very fond of [] and thought of him as a very capable officer and leader, and I feel that the knowledge and experience gained by him and [] in the handling of the Sub-system I of 117L could certainly be useful to CIA with appropriate security clearances in developing our intelligence data handling systems for the new National Photographic Intelligence Center.

3. My question then specifically relates to the fact of [] current contractual relationship to CIA, his clearability under our common program, and the potential that we might have for utilizing him and his assets he represents in our systems development.
